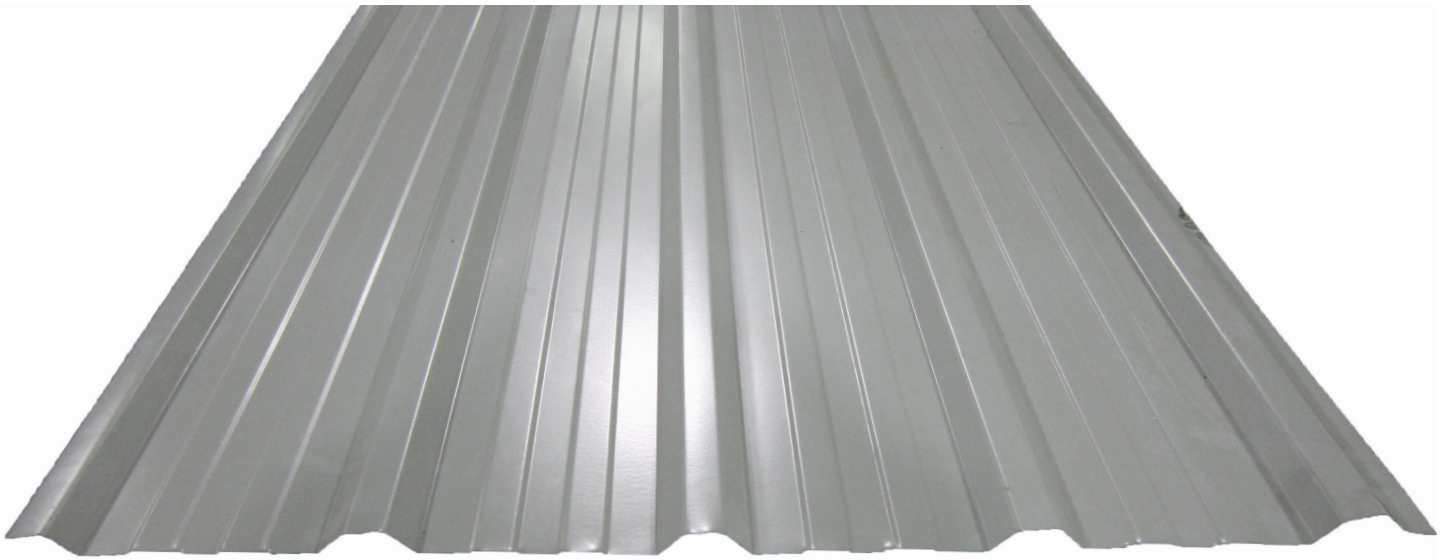
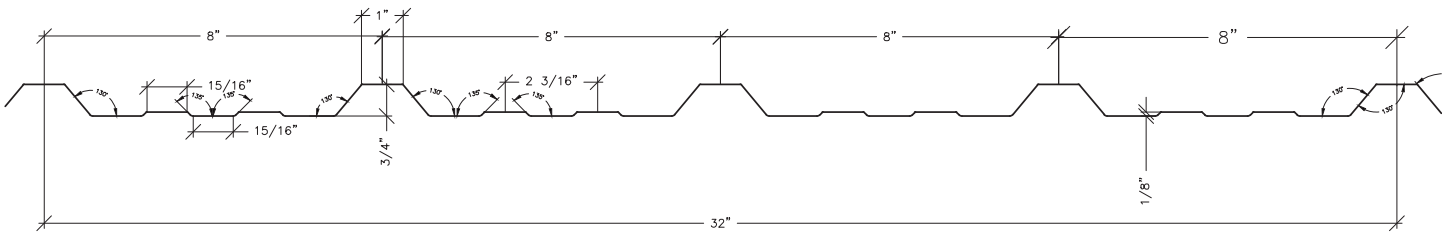
NS 832 LINER PANEL

26 Gauge & 29 Gauge





This is a low rib panel that is used for lining the inside of steel buildings for a clean and maintenance free, easy to clean interior. This panel, along with CNC bent custom trims, can also be used for covering walls and roofs of existing wood buildings to make it maintenance free. This strong and attractive panel is suitable for agriculture, commercial, and industrial applications. Also available in PVC for high humidity areas (profile may differ).
